AI Agent Orchestration for Institutional Equity Research

Starting with Japan · Scaling Globally

The Problem

Fundamental equity research is broken for Japan-focused institutional investors

Language Barrier

70%+ of Japanese corporate filings, earnings transcripts, and IR materials are only available in Japanese — inaccessible to most global fund managers

Manual & Slow

Analysts spend 15–20 hours per company on fundamental research. Coverage is limited to 20–40 names per analyst, leaving thousands of opportunities unseen

Fragmented Data

Critical data is scattered across EDINET, TDNet, company IR sites, and local news — no single platform synthesizes it for actionable insights

3,900+ listed companies in Japan · Only ~15% covered by English-language research · $6.2T market cap

Our Solution

An AI agent orchestration platform that automates end-to-end fundamental equity research

Think of it as...

A team of 100 AI analysts working 24/7

Each specialized agent handles one piece of the research puzzle — reading Japanese filings, building financial models, running valuations, synthesizing news — then orchestrates them into institutional-grade research reports.

- Japanese NLP that understands financial context and nuance
- Multi-agent orchestration: each agent = one research task
- Automated financial modeling, valuation, and risk scoring
- Designed for Japan first, architected for global scale

Product

AI Agent Orchestration Infrastructure for Equity Research

AGENT PIPELINE

Data Ingestion

EDINET, TDNet, IR sites, news

Japanese NLP

Filings, transcripts, management commentary

Financial Modeling

3-statement models, scenario analysis

Valuation Engine

DCF, comps, sum-of-parts

Report Generation

Institutional-grade research output

- Real-time monitoring
- Multi-company screening
- Custom agent workflows
- API integration

Business Model

SaaS subscription with usage-based pricing tiers

Explorer
$5K/mo

- 50 company reports/mo
- Standard financial models
- Email delivery
- Japan large-cap coverage

POPULAR

Professional
$15K/mo

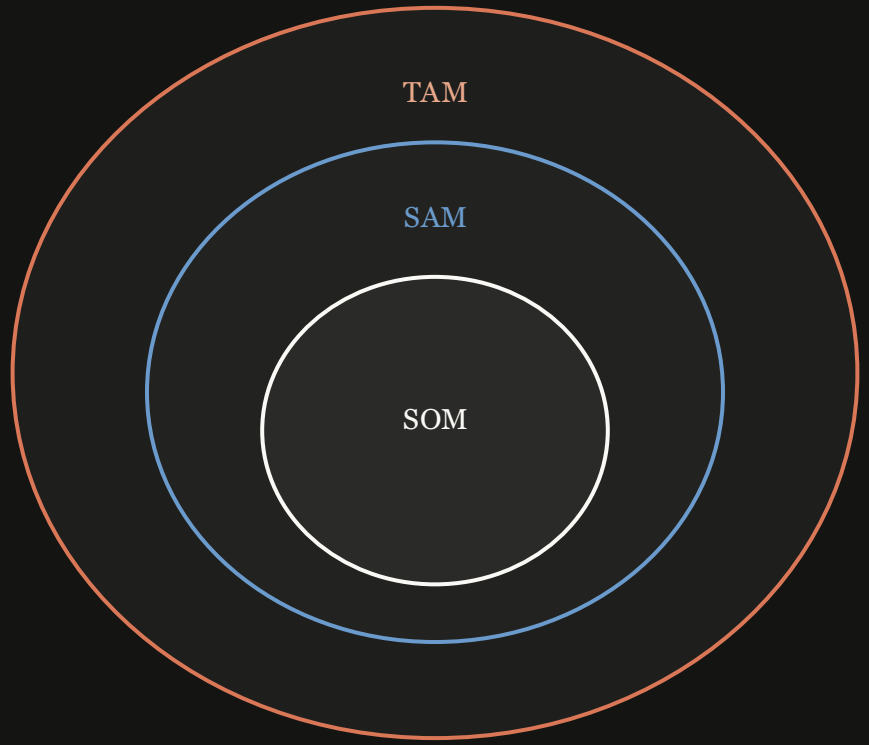
- 200 company reports/mo
- Custom agent workflows
- API access
- Full Japan coverage (all-cap)

Enterprise
Custom

- Unlimited reports
- Dedicated agent infrastructure
- On-prem deployment option
- Global market expansion

Target: $1M ARR within 18 months · 90%+ gross margins · Net Revenue Retention > 130%

Market Opportunity



TAM **$48B**

Global financial data & analytics market (Bloomberg, Refinitiv, FactSet, S&P)

SAM **$8.5B**

AI-powered equity research tools for institutional investors globally

SOM **$850M**

Japan-focused AI equity research for hedge & mutual funds (Year 5 addressable)

Source: Grand View Research, Allied Market Research, internal estimates

Go-to-Market Strategy

Land with Japan, expand globally through proven value

PHASE 1

Months 0–6

Japan Deep Dive

- Target 10 pilot funds investing in Japan equities
- Free trial of Japan large-cap research reports
- Build feedback loop with early adopters
- Focus on accuracy and trust-building

PHASE 2

Months 6–18

Japan Expansion

- Expand to full Japan coverage (mid/small-cap)
- Launch paid subscriptions
- Build API for integration with existing workflows
- Target 50+ paying institutional clients

PHASE 3

Months 18–36

Global Scale

- Expand to Korea, ASEAN, and broader Asia
- Add US and European market coverage
- Enterprise tier with custom deployments
- Target $10M+ ARR

Competitive Landscape

	Bloomberg / Refinitiv	Traditional Research	AI Startups (US-focused)	NousAlpha
Japan depth	Partial	Deep but slow	Minimal	**Deep + fast**
Japanese NLP	Basic	Human-only	None	**Purpose-built**
AI agents	No	No	Single model	**Multi-agent orchestration**
Speed to insight	Hours	Days–weeks	Minutes	**Minutes**
Coverage breadth	Wide	Narrow (20–40)	Wide	**Wide (3,900+)**
Price point	$25K+/yr	$50K+/analyst	$10–30K/yr	**$5–15K/mo**

Key Differentiator: Origin is the only platform combining purpose-built Japanese financial NLP with multi-agent AI orchestration — delivering institutional-grade Japan equity research at 10x the speed and 1/5th the cost of traditional methods.

Traction & Roadmap

WHERE WE ARE

- Core AI agent architecture designed and prototyped
- Japanese financial NLP model in development
- 2 co-founders committed full-time
- Advisory conversations with 5+ Japan-focused funds
- Participating in YC W26 batch

ROADMAP

Q2 2026	Launch MVP — Japan large-cap coverage (top 100)
Q3 2026	First 10 paying pilot customers
Q4 2026	Expand to full Japan coverage (3,900+ companies)
Q1 2027	API launch, custom agent workflows
H2 2027	Expand to Korea & ASEAN markets
